

Nation's top problem solvers

THERE is no problem too big for these students.

Two teams of Loreto Normanhurst students won first and second place at the 2012 National Future Problem Solving competition in Melbourne recently.

The school's Year 9 community problem solving team won the middle division of the competition with their efforts to cel-

brate cultural diversity in the community.

The Year 10 global issues problem solving team placed first and second in the presenting and planning sections, respectively.

Both teams will now represent Australia in the International Future Problem Solving Competition in the USA next June.

"We are very proud of the

students who took part in the program this year and value the program's aim of giving young people the skills to promote positive futures for the society in which they live," said principal Barbara Watkins.

"We support our students in a critical awareness of structures in our society that affect the most disadvantaged."
